PROFESSIONAL EXPERIENCE

Exercises For Injuries (EFI) **2023 - Present**

Web Developer

- Develop and manage WordPress websites, sales funnels, and custom WordPress functionality based on client and business requirements.
- Manage website hosting through WHM and cPanel, including domain and subdomain setup and troubleshooting hosting-related downtime and site availability issues.
- Assist with Cloudflare setup and DNS management, including adding websites and configuring or updating DNS records.
- Use GTmetrix to identify performance issues and optimize slow pages through image compression, asset optimization, and JavaScript loading improvements such as defer.
- Create simple website layout and UI/UX mockups in Figma to communicate proposed page structure and design direction before development.
- Perform ongoing website maintenance, including content updates, plugin updates, troubleshooting, security-related maintenance, and performance checks.

Fligno Software Philippines, Inc. **2020 - 2023**

Software Engineer

- Collaborated with cross-functional teams to design, develop, and deploy software solutions based on client and user requirements.
- Used Git for version control and team collaboration across shared code repositories.
- Performed software testing and debugging to identify and resolve issues and improve application reliability.
- Designed and optimized SQL database schemas for efficient data storage and retrieval.

EC Insurance Company **2022 - 2023**

Freelance Web Developer (Part-Time)

- Designed and developed a responsive real estate website with emphasis on user experience, visual presentation, and cross-device compatibility.
- Used WordPress for content management and performed ongoing maintenance, troubleshooting, plugin/theme updates, and security-related upkeep.

Binnovate Digital Media **2019**

Web Developer (Intern/Trainee)

- Developed and published WordPress pages and posts and integrated images, videos, and infographics for healthcare-focused website content.
- Worked with the marketing team to align website content with sales funnels and monitored traffic and engagement to support optimization.

Future Tranz Solution Inc. **2018**

Software Engineer (Intern/Trainee)

- Developed and maintained front-end components of a buy-and-sell car platform using vanilla JavaScript, HTML, and CSS.
- Collaborated with back-end developers on API integration and debugged front-end issues to support reliable application behavior.
